Jonas Enlund

I am a guy from Göteborg who enjoy learning new things, both for professional use and just by own interest. My current learning goals include neural networks and front-end development. Previous learning goals and interests have led me to explore stock market trading, database design and implementation, and particle physics which I still am very fascinated by. If I would be to describe my three strongest traits it would be honesty, helpfulness, and problem-solving mindset. My spare time is spent at home with a puzzle or board game, under the ocean looking for beautiful things, in a tent between hikes, or solving pub quizzes.

Education

MSc Programme in Quality and Operations Management (120 HEC), Chalmers University of Technology, Göteborg

September 2015 — June 2017

Pivotal courses: **Six Sigma Black Belt** certification course, Operations Strategy, Change Management, **Design for Quality**, ICT Economics and Policy, Integrated Product Development, and Project Management. My MSc thesis on the topic of motivation, creativity and **societal engagement** on individual and organisational level have been used professionally both by companies and professors.

BSc Programme in Industrial Engineering and Management (180 HEC), Chalmers University of Technology, Göteborg

August 2009 — June 2012

Programme in Industrial Engineering and Management, including 37,5 HEC of IT courses and a finishing BSc thesis in the topic Small Companies' Internationalisation Process.

Employment History

Integration Owner & Developer at BrightCom Solutions AB, Göteborg

August 2022 — May 2023

Position where I was responsible for the quality and development of several integrations between Business Central and various CMS systems as well as maintenance of the hub used as a central point of communication between all integrations.

System Developer at Iver Sverige AB, Göteborg

August 2021 — June 2022

Time limited assignment through Nexer AB where I supported Iver in development and maintenance of their internal ERP system built as an WPF application on top of MSSQL and with several APIs and case specific applications.

Integrations Developer and Solutions Architect at iAdvice ApS, Aarhus

January 2021 — June 2021

Time limited assignment at Exsitec's Danish subsidiary to support the new development team with mentoring, planning and development. Development tasks involved much like that at Exsitec, with the addition of more hosting and VB.net development.

Application Consultant & Developer at Exsitec AB, Göteborg

December 2017 — January 2021

Employed as an Application Consultant to implement the ERP-system Visma.net, and to educate and support customers in the usage of it. During the spring of 2018, I stated that I wanted bigger challenges, and was appointed the role as responsible for integrations towards the product. Since then, I have developed many integrations and applications, as well as being the company's main contact towards our supplier Visma in the topics touching upon integrations towards Visma.net. To speed up the implementation of updates to the API, I've developed automated client generation and change tracker. During the last year of employment, I were more involved in other projects such as Visma Business integrations, custom applications, and more sales and solution design.

Client Coordinator & Finance assistant at Damco Sweden AB, Göteborg

March 2016 — January 2017

Part time job during studies. Working mainly with invoicing to customers and from suppliers and the improvement of the processes of managing these. During the summer I undertook a new customer process implementation project. At the time of finishing, I had implemented automation worth ~2 hours of weekly work.

Purchasing Controlling Intern at Robert Bosch GmbH, Stuttgart

June 2012 — December 2012

Internship within the Purchasing Controlling department at the Purchasing Headquarters of Bosch in Stuttgart, Germany. Tasks mainly consist of price analyses as well as coordination and tracking of the Business Plan Process. Responsible for controlling a Material Field with an annual turnover of ~100 mEUR.

Skills

- Microsoft Excel
- SQL
- Database Design
- Windows usage
- Azure application hosting
- Scrum
- Workshop Facilitation
- Teaching
- .NET
- WPF
- Visual Studio
- Debian usage
- Network Design
- Azure DevOps
- Change Management
- Problem Solving

IT Knowledge

.NET Development Skills

Five years working experience in developing applications using **C#** and .NET for integrating business applications as well as standalone applications. Business systems integrated towards include Visma.net, MediusFlow, Unifaun, Centra, NuORDER, and more, mainly using **RESTful APIs** and **MSSQL** databases. Integrations have been developed to be hosted on Azure and Windows servers, and applications to be run locally in command line or as WPF-applications on user's PC.

Languages

- Swedish** Native speaker
- English** Highly proficient
- Danish** Very good command
- Norwegian** Very good command
- German** Working knowledge

Extra-curricular activities

23rd Vice President of Activities at European Students of Industrial Engineering and Management, Europe

December 2012 — December 2013

Board position with responsibility for coordination and tracking of all events within the network. The annual event portfolio consists of some 70 events within a wide span of event categories taking place throughout Europe. During the term I visited over 60 cities in 15 countries during 220 days on the road.

Certifications

Six Sigma Black Belt

June 2016

Certified through a course at Chalmers Uni. where a process mapping project at Wärtsilä Sweden AB was run by a project group consisting of me and four others. The result was to be used in a future process improvement project. During the project common Six Sigma tools in combination with statistics and data mining was used.

MOUS Master

June 2006

Level Expert in Microsoft Office Word and Excel, level Core in PowerPoint, Outlook and Access. This certification together with heavy professional use have made me outstanding in Excel and Word, and made me the go-to-guy both in my class and at my workplaces, even after only a month on site. Also after employments have ended I have been consulted for this knowledge. MOUS (Microsoft Office User Specialist) is now rebranded as MOS (Microsoft Office Specialist).
